

TUFF TECH BAGS

Flexible Rain Barrels for any location

- Installs where plastic tanks cannot
- Cheaper and greener to ship than hard plastic tanks
- Holds from 150 to 50,000 gallons of water
- Easy to store and winterize
- Material is flexible to -40°
- Basic units are very easy to install
- Available in NSF 61 approved material for potable water
- Larger flexible rain barrels require an accredited contractor

Flexible Rain Barrels for any location

RESIDENTIAL USE

- 150, 300, 400 and 500 gallon size options
- Choose from 4 basic colours or customize your bag colour
- Large water volume, small footprint
- Removable, zippered lid to dip buckets; convenient garden hose fitting
- Install anywhere - no concrete pad required, stable on slopes up to 10°
- Easy winter storage; will not crack when frozen (up to -40°)

HIDE AWAY FLEXIBLE RAIN BARRELS FOR DECKS AND CRAWL SPACES

- All flexible rain barrels are fully enclosed to keep out mosquitos
- Easy to keep water and bag clean
- UV protected
- Lower purchase cost

BURIED FLEXIBLE RAIN BARRELS

- Install a flexible rain barrel in a culvert to make your own cost effective buried cistern
- Easy installation
- Culverts easily meet H20 live load standard

ENVIRONMENTALLY BETTER

- Less plastic used (rain bag weighs 4lbs vs. 22lbs of hard plastic rain barrels)
- Less packaging, cheaper to ship
- Guaranteed for 10 years; most are still in use after 15 years
